PACKAGING INTELLIGENCE. SPECIALIST IN PACKAGING.

We take responsibility for complete packaging projects. We are perfectly prepared for this. You reduce your work and expenditure: we deliver cocoon-designed packaging solutions of the newest generation for your supply chain.

- 3D development
- Material optimisation
- Eco-optimisation
- Product-specific construction
- Independent of materials
- Material combinations
- Digital design and calculation
- Process and handling optimisation
- On-demand production
- Cost-effective optimisation

ECO-INTELLIGENCE. COMPETITIVE ADVANTAGE ENVIRONMENTAL PROTECTION.

WE DEVELOP WITH ECO-INTELLIGENCE

Eco-intelligent packaging works with a minimum of materials used and conserves resources. Packaging solutions with eco-intelligence impress customers with their maximum recyclability and have been optimised for the circular economy. Eco-intelligent packaging systems are your additional selling point.

COST-EFFECTIVENESS. A QUESTION OF INTELLIGENCE.

With our own intelligent packaging strategies, we minimise the use of materials, process costs and project times. We focus on maximum efficiency.

YOU DON'T GET A SECOND CHANCE TO MAKE A FIRST IMPRESSION.

Appearance – feel – precision – design: perfect and high-grade POS packaging is a measurably decisive factor when it comes to better sales figures. Naturally secure. Naturally high-quality. Naturally successful.

ON-DEMAND PRODUCTION. JUST-IN-TIME DELIVERY.

Flexibility is a principle of merit for us: manufacturing without product-specific tools with digital machinery. Rely on a manufacturing strategy that is faster, more flexible and more efficient than that of your competitors.

- No tool costs
- Short set-up times
- Digital workflows: from orders arriving to goods delivery
- Optimum batch sizes for your requirements
- Real-time change management
